# SPECULATIVE (VERY HIGH RISK) GBP MODEL PORTFOLIO

# QUARTERLY FACTSHEET

31st MARCH 2025

### **OBJECTIVE**

Exclusively available to our Active clients, this Speculative portfolio comprises a wide range of diversified investment vehicles including unit trusts, mutual funds and exchange traded funds (ETFs), whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternatives classification.

Active Speculative seeks to generate aggressive capital growth over the long-term (7 years or more) and can experience very high levels of volatility in both the short and longer term. The portfolio will have a much higher high exposure to equities compared to Active Adventurous - potentially comprising 100% equity - though weightings may deviate within set parameters, allowing managers to react to market conditions.
