

CAUTIOUS (LOW TO MEDIUM RISK) EUR MODEL PORTFOLIO

QUARTERLY FACTSHEET

31st MARCH 2025

OBJECTIVE

This portfolio comprises sustainable investment vehicles including unit trusts, mutual funds and exchange traded funds (ETFs), whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternatives classification.

Sustainable World Cautious seeks to generate modest capital growth higher than bond based returns over the short to medium term (3 to 5 years or more) by employing a more cautious investment strategy than Sustainable World Balanced. The portfolio will have a modest approach to equity exposure - typically comprising 30% equity and 70% non-equity - though weightings may deviate within set parameters, allowing our managers to react to market conditions.
