

OBJECTIVE

This model comprises a wide range of diversified active investment vehicles including unit trusts and mutual funds, whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternative's classification.

The portfolio seeks to generate modest returns higher than cash in the bank over the short to medium term (3 - 5 years or more) with potential for consistent though constrained capital growth. Portfolios will typically comprise 10% equity and 90% non-equity, though weightings may deviate within set parameters, allowing managers to react to market conditions.

CURRENT ASSET ALLOCATION %

*Absolute return, multi-asset and property may all feature within the alternative's classification.
