# ACTIVE CAUTIOUS (LOW TO MEDIUM RISK) GBP MODEL PORTFOLIO

## QUARTERLY FACTSHEET

## **31 DECEMBER 2023**

### **OBJECTIVE**

This model comprises a wide range of diversified active investment vehicles including unit trusts and mutual funds, whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternative's classification.

The portfolio seeks to generate modest capital growth higher than bond-based returns over the short to medium term (3 - 5 years or more) by employing a more cautious investment strategy than Active Balanced. The portfolio will have a modest approach to equity exposure - typically comprising 30% equity and 70% non-equity - though weightings may deviate within set parameters, allowing our managers to react to market conditions.
