

RISK PROFILE: LIQUIDITY PLUS (VERY LOW RISK)

DATE: 31 DECEMBER 2023

**PORTFOLIO OBJECTIVE**

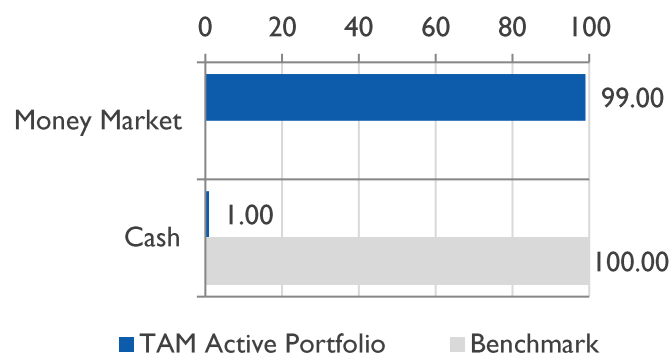

This model comprises investment vehicles focusing on money market funds to deliver cash like returns. Asset classes you could find in this model are cash plus funds and high-quality ultra short duration fixed interest.

The portfolio seeks to generate a return moderately higher than cash over the short term (1-3 years or more) while maintaining very low volatility and a high level of liquidity. Portfolios will comprise 100% non-equity investments, though weightings may deviate within set parameters, allowing our managers to react to market conditions.

**KEY INFORMATION**

Portfolio Benchmark	100% Cash

RISK PROFILE: LIQUIDITY PLUS (VERY LOW RISK)

DATE: 31 DECEMBER 2023

## QUARTERLY REVIEW

Markets in December continued November's strength to deliver more gains for clients. The extent of the "everything rally" in December helped to propel the fund higher into the end of the year which has been a welcome change to these challenging markets.

The drivers of December's strength continued on the view that central banks have finished with raising interest rates to combat inflation. The gain in the broad global equity market from December was just under 5% with sustainability focused investments within the fund returning more than this.

Bonds were also strong performers, with the likes of emerging market debt returning strongly in December. Government debt also put in a strong reversal with the likes of US treasuries rallying some 7%, and UK gilts rallying 9% from the October lows.

## QUARTERLY OUTLOOK

The steep end of year rally has served to price in around 4-6 interest rate cuts within developed economies for 2024, which we think is ambitious given services inflation remains strong, as does the jobs market. It seems prudent that the risk from here is that markets don't get an inflation rate continuing to come down to 2%. This could force central banks to rethink their commentary around 6 interest rate cuts next year, which should see some of the 2023 positivity come out of markets.

When it comes to equities, we remain bullish on funds investing in high quality and sustainable companies. We also think it makes sense to look towards areas of the equity market which remain undervalued, as opposed to those areas which have done so well in 2023, such as the 'Magnificent 7' AI tech stocks.

We are also reevaluating the notion of dividends as a source of core investment return rather than just income, which we see as a strong growth area for markets in the coming years.
