

OBJECTIVE

This model comprises a blend of sustainability focused investment vehicles including unit trusts and mutual funds, whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternative's classification.

The portfolio seeks to generate modest returns higher than cash in the bank over short to medium term (3 – 5 years or more) with potential for consistent though constrained capital growth. The portfolio will have a modest approach to equity exposure - typically comprising 30% equity and 70% non-equity - though weightings may deviate within set parameters, allowing our managers to react to market conditions.

CURRENT ASSET ALLOCATION %

*Absolute return, property and commodities may all feature within the alternative's classification
