

ONLINE ACCOUNT PORTAL USER GUIDE

TAM provides an online web portal which offers clients an extensive range of features to maximise the efficiency with which they can manage their investment portfolios. This includes a comprehensive overview of their investment portfolio detailing individual investments and implicit performance, as well as the reasons behind each individual investment. Clients can also view a breakdown of the sector, geography and currency exposures within their portfolio, as well as a full portfolio valuation since inception. Professional advisers are also able to produce a full electronic investment review for their clients within seconds, at any time of the day. These are just a few of the valuable tools our clients can access through our online portal.

The following document delves deeper into the functionality of our online portal to ensure that our advisers and their clients are able to take full advantage of the resources they have at their fingertips.

Appendix I: How To Create A Bespoke Report	9-12

Account Details

When you log in to TAM's online portal using the log in details provided to you on account opening, as an adviser, you will see a list of your clients who are invested in TAM's model portfolios. As a client, you will go direct to the following page called 'Account Details', which gives a basic summary of the account type, market value of the portfolio, monetary gain/loss and percentage gain/loss since inception.

REPORTS

The 'Reports' function enables you to generate a customisable investment report for your client within seconds- see Appendix I for details.

(NOTE: A TAM Focus portfolio has been used throughout this document for demonstrative purposes)

On this page, you will also see a breakdown of the portfolio's exposures across sectors, geography and currency, as well as TAM's latest Urgent Manager Commentaries, which are reports on the latest market news.

Urgent Manager Commentary (last 28 days) [View Older >>](#)

- 26 Jul 2017 **UK Growth remains subdued, borrowing falls slightly**
 Economic growth has risen marginally in Q2, up from 0.2% in Q1 to 0.3% in the three months to June. Year-on-year, growth has fallen from 2% to 1.7%, showing a slowdown is taking place, but nonetheless reflects a resilient economy considering inflation has been picking up throughout the year. Whilst the GDP figures were in line with average forecasts, new UK mortgage approvals have slightly beaten forecasts, with total mortgage borrowing remaining relatively flat at around £13 billion. 40,200 new mortgages were approved in June, down from 40,287 in May. Other borrowing such as personal loans have fallen slightly (around 1%), yet annual growth in credit card borrowing has remained flat at 5.5%. Today's releases come as little surprise, allowing UK equity markets to continue making gains today and for UK bonds to see strength. Sterling is relatively flat against major currencies ahead of the US Federal Reserve Meeting later today.
- 20 Jul 2017 **ECB and Bank of Japan keep monetary policy on hold**
 As expected, the European Central Bank (ECB) has announced it will leave interest rates unchanged in its press conference held earlier today. Mr Draghi reaffirmed the view that Europe still has plenty of way to go in its recovery and a substantial amount of stimulus is still needed to support this growth, downplaying his hawkish comments on the eurozone recovery made at the end of last month. Mr Draghi has also said there is no specific date when the ECB will think about a change in its bond buying programme, but pledged to step up its 60 billion euro-a-month quantitative easing programme if necessary. The euro is up 0.4 per cent on the day against the dollar, as the market absorbs Draghi's announcement. The Bank of Japan has followed the ECB by leaving its monetary policy on hold and has pushed back its inflation goal by a year, to 2019. Comments referring to a weaker than expected consumer price index in Japan caused the yen to slip 0.2 per cent against the dollar.

To view the full portfolio, you will need to select the account reference, highlighted above.

My Portfolio

NOTE: As a default, funds are split by risk sector; however clicking 'Risk Sector' allows you to split the funds in alternative ways e.g. by theme, industry sector or security risk profile.

Illustration only, past performance is not a guide for future returns. The value of investments, and the income from it, may go down as well as up and may fall below the amount initially invested. Weightings may deviate from these levels at the Investment Team's discretion whilst staying within specific guidelines, so the above asset allocation is intended as a guide only.

The 'My Portfolio' page is a summary of all the positions held within your/ your clients' portfolio, including the amount held (in units and as a percentage of the overall portfolio), the monetary value of the holding and the profit or loss made on the position since its addition. The 'My Portfolio' tab will always appear in the top panel to return you to this page when you have navigated away.

Cash Accounts

The cash account shows dates and details of all cash movements into and out of the portfolio since inception including adviser and third party fees, purchases/sales of funds, withdrawals and dividends received. To see the Cash Transaction Narrative, simply select the date of the transaction and the narrative will appear at the bottom of the page.

Funds

If you wish to look closer at an individual fund, just click on the fund name and you will be directed to a page which gives you a thorough overview, including a short description of the issuing company and security, a link to the KIID document, details of all the trades made on this specific fund starting with the initial purchase (displayed in the illustrative graphic below), a full breakdown of the underlying asset allocation of the fund and a list of commentaries from the Fund Manager (typically produced on a monthly basis).

Selecting a trade date will direct you to a page which details the specifics of the trade, including a narrative written by a member of TAM's investment team, outlining the reasons behind the trade.

(NOTE: reasons may include tactical changes to TAM's asset allocation, or simply to raise funds for a withdrawal request or for rebalancing purposes following cash in etc.)

Trade Detail				Trade Narrative						
Holding	Equity Fund			We have purchased the Fund within your portfolio, which aims to achieve capital growth through investing primarily in shares of companies within Continental Europe. The fund's investment strategy rests primarily on rigorous fundamental analysis and company valuations, combined with a close scrutiny of the macroeconomic context, to identify what they believe to be the best investment ideas in Continental Europe. With political volatility in Europe beginning to subside in anticipation of a positive French election result, we believe that Europe is set to enter a market of sustained growth, both from a bottom-up company level and a top-down economy level. This has been reflected in strong macroeconomic data which has helped European equity markets remain strong. We believe this fund is well positioned to benefit from this growth and inflationary environment which we anticipate, particularly on prospects of the ECB beginning to tighten monetary policy.

tam

Trade Details				Narrative
Security	Example Fund 1			
Trade Type	Buy	Deal Currency	GBP	
Trade Date	20th July 2017	Consideration	22,009.78	We have made the addition of the Fund to your portfolio in order to provide you with direct exposure to emerging markets, which we believe remain attractively valued relative to developed markets, despite their strong performance over the past year. The region is being supported by a rebound in global growth, a weaker US dollar and signals from the US central bank that it won't be raising interest rates too hastily. The fund follows a blended investment style, with the aim to identify quality companies trading at attractive valuations largely through bottom-up analysis, but rooted in a top-down framework that identifies countries with conditions supportive of long-term growth.
Value Date	26th July 2017	Commission	15.00

Trade Details	Example Fund 2			
Security	Example Fund 2	Deal Currency	GBP	
Trade Type	Buy	Consideration	20,725.79	We have increased your holding within Fund, which follows a value orientated investment process to identify what the team believe to be the best investment ideas in Continental Europe. We believe that Europe has entered a market of sustained growth, both from a bottom-up company level and a top-down economy level, with political volatility subsiding and strong macroeconomic data coming through, while valuations remain relatively attractive versus other developed countries. The fund also has an overweight to the financials sector, which is an area of the market we are currently favouring, given the improvement in the health and earnings of many European and US banks and the expectation of a more favourable interest rate environment ahead.
Trade Date	21st July 2017	Commission	15.00	
Value Date	26th July 2017	Bargain Charge	0.00

Status	Reconciled	Proceeds		
		Profit/Loss		
Trade Details	Example Fund 3			
Security	Example Fund 3	Deal Currency	GBP	
Trade Type	Buy	Consideration	21,932.24	We have added the Fund to your portfolio, which generates modestly positive returns in a variety of market conditions by blending investment strategies together. There is some conventional exposure to risk equities and bonds across various markets which the managers see as attractive. There are a variety of positions, often involving currencies and interest rates, which the managers' view plays out. The fund has a solid track record, displaying reliable returns in all market conditions. We believe, with the current market performance for you in both rising and falling markets, whilst not presenting the same risk associated with equity, long-only funds.
Trade Date	24th July 2017	Commission	15.00	
Value Date	27th July 2017	Bargain Charge	0.00
