3. Please inform us if you wish to amend your payment details.
4. When your credit card payment is first set-up certain checks will be administered, including a pre-authorisation check. A nominal amount may show on your account, but the pre-authorisation is not a charge and no money will be deducted from your account.

RISK WARNING AND MANAGEMENT

Every Investment has a risk attributable to it and the combination of individual investments produces the overall risk of a portfolio. For this reason, not all individual investments within a portfolio are the same as the overall risk mandate for a chosen portfolio.

The allocation to investments will vary in individual risk levels but as a combined portfolio they are constructed to balance each other out and meet the mandated risk profile. Investments within portfolios may go down as well as up and you may therefore not get back the full amount invested. Any income derived from your investments can also go down. Risk, even within specific investments, may alter over time and whilst every effort is made to fit appropriate investments with specific risk profiles no guarantees can be made.

Please also bear in mind that past performance is not necessarily a guide to future returns and that there is always the possibility that you may receive back less than your original investment.

Foreign currency

Some of our underlying investments are denominated in currency/currencies which will be different to your portfolio currency. This increases the risk that movement in exchange rates may affect the returns you may receive from the investment.

Risk Attributed to the Portfolio

We have been advised as to the appropriate risk level to apply to this portfolio by your financial adviser. The portfolio will be created based on this instruction and TAM can take no responsibility for confirming the correctness of the risk classification advised.

Financial advice

TAM is a provider of Discretionary Investment Management Services to clients via regulated intermediaries. We are solely responsible for the management of an investment portfolio within the risk parameters agreed. TAM does not provide financial or investment advice either in relation to your overall financial situation, or to the structuring of the vehicle through which your investments are made. This area of expertise remains solely with your financial adviser and TAM is not responsible for any advice given as to the tax efficiency or otherwise of any packaged product ultimately utilised for these investments.

Liquidity risk

Typically, portfolios can be liquidated within several days by TAM, though it may take a few days after that for you to receive your proceeds. However some less liquid asset classes like property funds may at times (though uncommon), temporarily suspend trading. Typically should investment in property funds be sought, this will only represent a relatively small part of our overall portfolios, and whilst suspension of such funds is rare, you may not always be able to liquidate these holdings when you may like to.

It is also important to be aware of the liquidity risk inherent in the bond market, which is the risk stemming from the lack of relative ease in security trading. The bond market is constructed from bid-offer spreads, which are a reflection of the supply and demand in the market for bonds. Liquidity risk increases as the spread widens and the price the buyer is willing to pay diverges from the price the seller is willing to accept. Where TAM decide to invest in funds that may have less liquid investments, we do our best to weigh the potential benefits against possible consequences and likelihood of such consequences occurring.

In the most simplistic terms, it is essential that we not only concern ourselves with the return we can generate but also the amount we can lose. Our Investment Committee reviews the overall portfolio risk versus the benchmark we set to ensure we do not unexpectedly put clients at a higher risk than envisaged.

Investments held outside of Model Portfolio Service

When investments are held or retained within a client's account that fall outside of the standard asset allocation for the VFS Regular Investment Plan, they will be deemed, by TAM Asset Management International Limited, to be held on an execution-only basis and will be segmented in valuations as a separate portfolio. Execution instructions for these investments will be at the discretion of the Client in association with their Adviser. TAM Asset Management International Limited accept no responsibility for any losses, or illiquidity caused by these investments.

For any such execution-only portfolio will be subject to a fee structure different from that standard Regular Investment Plan. All costs pertaining to an execution-only portfolio are detailed in the TAM Execution-only Pricing Schedule which is available from your Adviser.
